Geometric Designs in Paint

Materials

T-shirt

Paper

Pencil

Tape

Acrylic Paint

Foam Brush

Scissors

Instructions

1) Draw out your idea in pencil. Look for how many pieces of tape you will need and if you should do your design in layers.

2) Wrap your T-Shirt tight around the cardboard.

3) Cut a piece of tape for all of the edges of your design. If you are making stripes the tape can serve as a stripe. Make sure the tape is strongly adhered to the fabric. Look out for gaps!

4) Gently paint in color inside the tape - not pushing into the edges

- but gently covering them.

Think about how you are blending the colors - using the sponge to dab - or if you are leaving the colors bold and graphic.

5) Wait for the paint to dry or carefully remove the tape making sure the wet edges don't touch the shirt.

5) Put your shirt in the drier on high for 15 minutes before washing. Wash with like color or alone for the first wash.
